

Tennis Racquet Cookie Tray

Written By: Team Recycling Et Cetera

TOOLS:

- [Hacksaw \(1\)](#)
- [hand-held electric drill \(1\)](#)
- [small drill bit \(1\)](#)

PARTS:

- [Thin wire \(1\)](#)
- [tennis balls \(1\)](#)
- [tennis racquet \(1\)](#)
- [Glue \(1\)](#)

SUMMARY

This easy-to-make kitchen utensil takes only a short amount of time to build. Only a small number of tools are required and parts can be found virtually anywhere.

Step 1 — Tennis Racquet Cookie Tray

- Take three tennis balls and drill holes 1" apart in a straight line. These will be used to attach the balls to the racquet.

Step 2

- String a piece of wire 2" long through the racquet and into the holes. Apply super glue to create an extra-strong bond.

Step 3

- You started with three tennis balls and an old racquet.
- Now you have a cool kitchen utensil!
- You could also cut tennis balls in half and use them to hold candles on top of the racquet.
